EXPERIENCE

Serbisyo & Shija Corporation — Dagupan City, Pangasinan

Lead Full-Stack Engineer (Freelance / Contract) | Jan. 2026 – Present

- Lead full-stack software development across web, mobile, and backend microservices to support expanding enterprise and consumer operations.
- Manage end-to-end application life cycles, collaborating with founders and team members from feature planning to staging and production deployments.
- Oversee database management to maintain service reliability and high system availability.
- Standardize development workflows and security practices across projects, incorporating rigorous code reviews, automated testing, and authentication standards.

PROJECTS

Serbisyo | *Flutter, React, Node.js, MongoDB Atlas, AWS, Docker, PayMongo* | March 2026 – Present

- Launched official website at serbisyoprovider.com and mobile apps on Google Play and App Store.
- Implemented real-time GPS tracking with location privacy controls for active service providers.
- Hardened backend security using role-based access control (RBAC), JWT tokens, and input sanitization.
- Set up automated end-to-end testing suites using Playwright and Vitest for CI/CD releases.

MyCrewManager | *Project Manager / Lead Developer / AI Engineer* | *Node.js, Express, React, Flutter, Python, PyTorch, Redis, Docker* | Aug. 2025 – Oct. 2025

- Led full-stack development of an AI project management platform across web and mobile.
- Migrated core REST APIs to **Node.js/Express** for real-time messaging and backlog tracking.
- Embedded LLM workflows with singleton model caching, reducing model load times by up to 75%.
- Architected WebSocket and smart polling integrations in **React** for live collaboration.

RescueLink | *Lead Developer / Full-Stack & AI Engineer* | *React, Node.js, FastAPI, Docker, Vercel, Render, GCP Cloud Run, Supabase* | Aug. 2026 – Present

- Architected a multi-platform emergency dispatching system across web, mobile, and REST APIs.
- Containerized a **FastAPI** AI service on **Google Cloud Run** for Whisper speech-to-text workflows.
- Deployed **React (Vite)** dashboard to Vercel and **Node.js** backend to Render with Supabase PostgreSQL.

Enterprise Warehouse Inventory & POS (Shija) | *React, Ant Design, Express, Docker* | Feb. 2026 – Present

- Built point-of-sale interfaces, real-time inventory monitoring dashboards for daily sales, and Warehouse management.
- Containerized multi-location services using Docker Compose for standardized deployment.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Dart, HTML/CSS, SQL
- **Frameworks & Web:** React.js, Vite, Node.js, Express.js, FastAPI, Flutter SDK, Ant Design, Tailwind CSS
- **Databases & Middleware:** MongoDB Atlas, PostgreSQL, Supabase, Mongoose ODM, Redis, Socket.IO, NGINX
- **DevOps & Infrastructure:** Google Cloud Run, Vercel, Render, AWS (EC2, S3), Docker, Docker Compose, GitHub Actions
- **Security & Tools:** PayMongo API, OneSignal, Speakeasy 2FA, Playwright, Vitest, Git, npm, Cursor AI

EDUCATION & ACADEMIC EXEMPTIONS

PHINMA University of Pangasinan — Dagupan City, Pangasinan

Bachelor of Science in Information Technology – System Development | Expected 2027

- **Academic Subject Exemptions:** Granted official academic exemptions for **Managing IT Resources** and **IT Business Solutions** in recognition of demonstrated production-level software engineering and industry work.

Certifications & Training

- **AWS Fundamentals Certificate of Completion** — *Zuitt Learning Institute Incorporated*
Completed 27 hours of instruction covering Amazon EC2, DynamoDB, S3, AWS Lambda, API Gateway, and serverless deployment on AWS (Issued May 2026).
